Rover VPN App - User Guide

1. Introduction

Welcome to Rover VPN App! This user guide will help you get started with the application and make the most out of its features.

2. Logging In

You should have received an email invitation to Rover. Check your email inbox, including the spam folder, for an email from Rover. Open the email and locate your username and temporary password provided in the invitation.

If you haven't received an email invitation, please contact your administrator or the support team at <.........................>.

Step 1:

Enter your username and password in the designated fields. Agree to the terms and conditions and select 'Login'.

User Name

Please enter your user name

Password

Please enter your Password 👁

☐ I have read and accepted the terms and conditions

Login

Do you need Support?

Step 2

The Authenticator app helps you sign in to your accounts when you're using two-step verification. Make sure you have the Authenticator app ready! Download and set it up using the instructions in your invite email. Once you have the Authenticator app configured, please enter the OTP from it and select Submit.

Please enter the OTP we sent.

Don't Received the OTP? Resend the OTP

Submit

3. Navigating the Dashboard
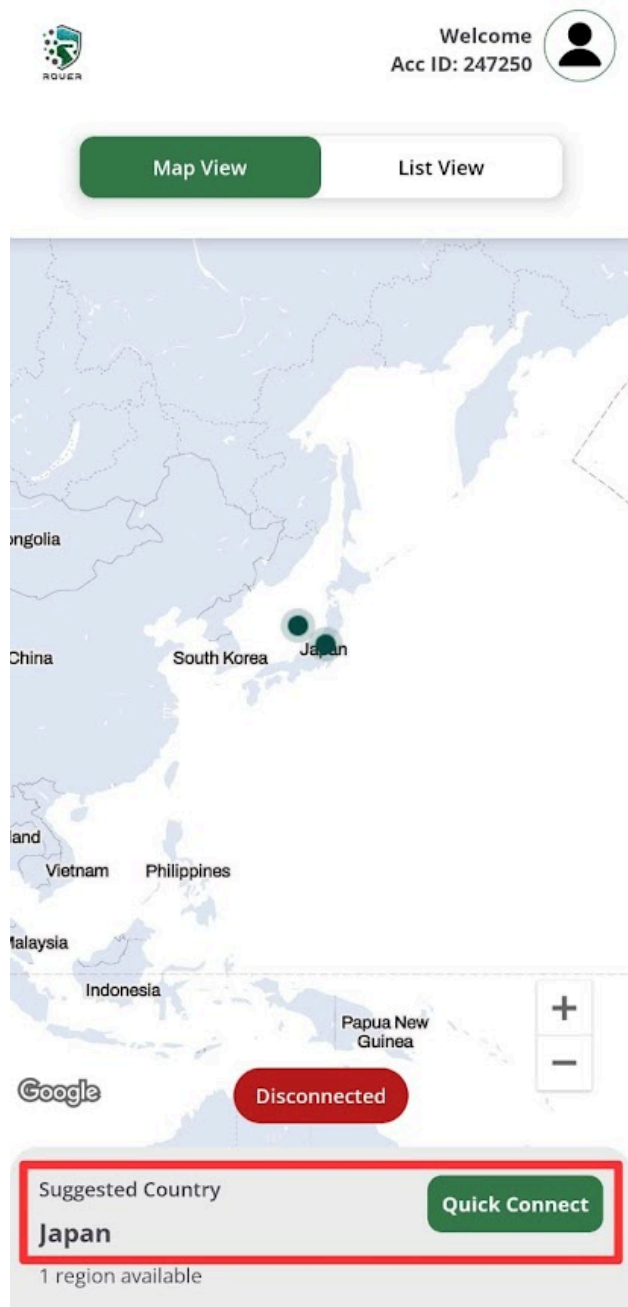

1. Once logged in, you will be directed to the following dashboard.

2. Rover lets you select VPN server in three different ways

a. Quick connect

b. Map view

c. List view

a. Quick Connect

With the Quick Connect option, Rover automatically connects you to the nearest VPN server.
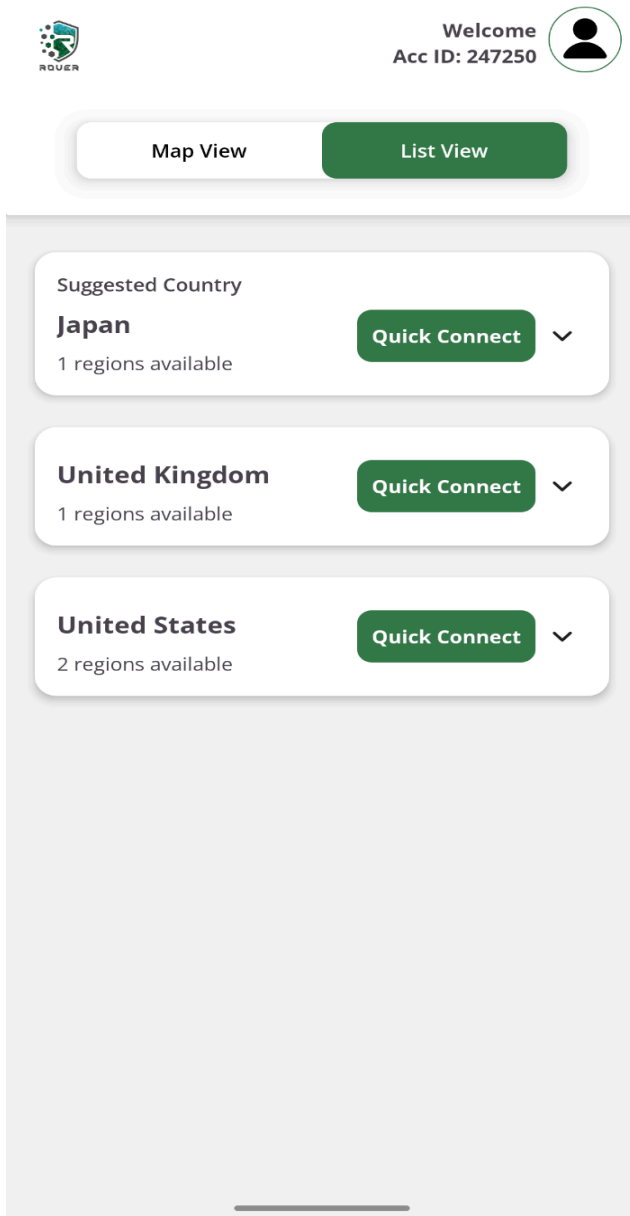

b. **Map View**

To access the map view Select 'Map View' from the selection bar. In map view, you can see the server locations on the map and choose the one you need. For example, the image we selected 'Japan' from the Map and it shows the list of available servers in Japan.

← **Tokyo**
    2 server available

dev-tokyo.rover.us   [Connect]

Load
40.0   Connectivity:
                                  Moderate
Select Configuration:
                             (<) 1 (>)

dev-tokyo-2.rover.us   [Connect]

Load
10.0   Connectivity:
                                      Fair
Select Configuration:
                             (<) 1 (>)

From the available server locations you can choose the one you need and click 'Connect'.

c. List View

In the list view, you can see the available server locations as a list and choose the one you need. To access the list view Select 'List View' from the selection bar.

The 'List View' will list out the available Servers. For example, in the previous image we selected United States from the list and it will show the list of available servers in United States

dev-austin.rover.us

Connect

Load
50.0

Connectivity:
Not Fair

Select Configuration:

< 1 >

dev-austin2.rover.us

Connect

Load
30.0

Connectivity:
Not Fair

Select Configuration:

< 1 >

Choose the server and the configuration you want to and select 'Connect'.

4. Accessing Your Profile

To access your profile, select your avatar on the top right corner of the screen.
